Subject: Cover letter

Hello,

I'm looking for a php developer opportunity, where I can evolve as a person and professional and this position seems to be the perfect opportunity for that, so I'd like to share a little about myself in this presentation.

I'm 23 years old and I've been working with technology since 2018, my journey started right after the first year of college where I had the opportunity to work as a php developer for Gálata Tecnologia, where I did my first PHP code and learned a lot about WEB concepts . I'm currently working on an international cruise sales project, where I'm responsible for improving the current code and making new features for the client.

During this time I had the opportunity to work with the following technologies: PHP, JQuery, Bootstrap, MySQL, PostgresSQL, Oracle, React, TDD, Clean Code, Git, Symfony, JavaScript, SOAP, REST, Docker, Jira, Scrum, Vue , Laravel, Kanban, SEO, DNS, OOP, CSS, MVC. Something that is also very important to me is learning English and continually improving what I already know. I really enjoy studying and I don't mind having to learn new things (actually it makes me excited).

Finally, I highly value teamwork and I always try to do my best for the good of the team, a detail that is no less important about my effort, I don't give up on something easy and as much as I can't, I will try until I reach the final goal.

see some of my projects on my Github: https://github.com/RazielMiranda

Sincerely,

Raziel Rodrigues
